

This is a report using the LubeKat for a marine diesel engine.
For 16 tons ship with 8700cc 6 cylinders.

Captain name: Mr. Yamagami

History;

First use of LubeKat was beginning of 2013.

The second change was in May, 2020.

1. When I used normal oil, I changed it every 3 months, averaging 4 hours a day.
2. After changing to LubeKat, it has been changed every 3.5 years.
3. After changing to LubeKat, the fuel efficiency improvement is about 9%.
4. I can clearly feel that the output power is increasing.
5. Changing the oil for the ship needs a hard work, but it is quite helpful because it can be used without changing for a long time.
6. I can't recognize the difference in the volume of oil reduction compared to normal oils, but I think there are few.
7. I feel the engine sound is much quieter than conventional oil.
8. Once you've used the LubeKat, you never use normal oil.
